

Infrastructure You Can Rely On!

## Cloud Propeller, Inc. – CLIENT TESTIMONIALS

Date: February 2020 | Version: 1.0

### CP Testimonial Quote Content:

The big difference between Cloud Propeller and other service providers is that they are willing to tailor their services for each customer. No one else would have been willing to do that. Before working with CP, our risk level was high. Now, we have a secure infrastructure, we have a plan, we are organized and we are prepared. – **Brent Ervin, IT Manager, Dynalab, Inc.**

Cloud Propeller was uniquely qualified to understand and deliver on a solution for Ohio Christian University. We needed a backup and disaster recovery system that met our specific needs. Because of their familiarity with and use of the OARnet system, the Dublin data center, and related fiber backbone, we know we're protected, and the CP team has become an extension of our department. – **John Bocook, Assistant Vice President of IT Services, Ohio Christian University**

Cloud Propeller took the time to get to know us and our product and gave us a solution to meet our unique needs. As a result, our system is nimble enough to quickly respond to changing requirements. - **Bud Budrejko, Lead Systems Engineer, DOmedia, LLC**

We trust Cloud Propeller's technical expertise and knowledge. Cloud Propeller provided us with tailored services to meet our unique needs. - **Dave Altman, Lead Systems Engineer, QStart Labs, LLC.**

### Additional:

Before Cloud Propeller, the majority of our backup and recovery solutions were developed in house on non-commercial hardware with little redundancy. The cost overhead of maintaining these types of solutions adds up and eventually falls behind, leaving the organization with unneeded risk. To mitigate that risk, we needed enterprise-grade hardware, a co-located data center, and both backup and disaster recovery platforms that were secure and reliable. – **John Bocook, Assistant Vice President of IT Services, Ohio Christian University**

Before CP, we didn't have disaster recovery. Now, we have quality solutions that we know are working, and we trust it. We know we're protected, and the CP team has become an extension of our department. – **John Bocook, Assistant Vice President of IT Services, Ohio Christian University**

## Cloud Propeller, Inc. – CLIENT TESTIMONIALS

Date: February 2020 | Version: 1.0

Our Recovery Point Objectives (RPOs) are very strict. In our world, we can't lose one second of data. Since working with Cloud Propeller, we are confident in our infrastructure and security. When there's been a rare issue, we've had zero down time. – **Brent Ervin, IT Manager, Dynalab, Inc.**

With Cloud Propeller, we can confidently develop and implement a business continuity and disaster recovery plan. Cloud Propeller actually knows how to build cloud infrastructure. – **Brent Ervin, IT Manager, Dynalab, Inc.**
